About CLS

CLS is a Dutch manufacturer of high-quality LED lighting solutions. With over 35 years' experience in professional lighting and 20 years' experience in LED lighting production, we are a trusted partner for the demands of today's market. Our fixtures offer the perfect solution for every project, thanks to bespoke configurations and the use of the best available components.

One of CLS's specialisms is the development and production of lighting for gardens, parks and outdoor spaces worldwide. In close collaboration with international lighting designers, we have developed a wide range of LED fixtures, with specifications and application possibilities perfectly tailored to outdoor use. All our outdoor fixtures have an IP67 rating.

Designed for versatility and impact

Our range of lighting solutions is designed to meet a variety of needs:

Atmospheric accents with attention to detail

Our fixtures make it possible to illuminate trees, plants, water features and art objects either subtly or with striking effect. By using dynamic coloured light or a precise beam angle, a unique visual experience is created, exactly as you envision it.

Applications:

- > Public parks and green spaces
- > Castle gardens and historic estates
- > Hotel and resort landscapes
- > Roof gardens and patios
- > Art and light installations in public spaces

Let your outdoor space speak – day and night

Choose CLS LED and discover how lighting can bring outdoor spaces to life. Contact us for advice, project support or a bespoke lighting solution.

Sustainability

At CLS LED, we believe it is important to contribute to a better world and a cleaner planet. Precisely because of the sector in which we operate and the products we offer, we can make a difference in every project where our products are used.

The modular design of our fixtures makes it possible to integrate multiple options into a single design and create a perfectly suited solution for every project, with easily replaceable components. With an average lifetime of 50,000 hours, fewer replacements and repairs are required, resulting in reduced use of natural resources, materials and energy, as well as lower maintenance costs. The total cost of ownership (TCO) is further reduced thanks to our 5-year warranty on fixtures and our 10-year availability guarantee for replacement parts.

Discover the CLS LED difference

At CLS LED, we have a passion for lighting that brings outdoor spaces to life. Not only functional, but also inspiring. Our solutions create atmosphere, enhance safety and deliver an unforgettable experience in gardens, parks and green outdoor environments. Thanks to our sustainable, innovative and flexibly configurable LED fixtures, we provide lighting solutions that integrate seamlessly into any landscape design.

Our IP67-rated fixtures are built to withstand all weather conditions, while a variety of beam angles, dimming options and light colours offer maximum design freedom. Whether it is highlighting a monumental tree, subtly illuminating a pathway or creating a vibrant lighting scene in a city park, with CLS LED, the possibilities are endless.

Smart control for every outdoor space

CLS LED offers advanced control solutions perfectly suited to outdoor lighting applications. Choose DMX512, for example, for detailed programming of lighting scenes, dynamic colour transitions and synchronised effects.

For those seeking simplicity and flexibility, Casambi Bluetooth offers the ideal solution. This allows you to manage your outdoor lighting wirelessly and intuitively via a smartphone or tablet. Perfect for gardens, patios or park lighting where you want to switch quickly and effortlessly between different atmospheres without complex cabling.

Whether you want to create a warm ambience for a peaceful evening walk or a colourful lighting accent during an event, the smart control solutions from CLS LED allow you to adapt the lighting effortlessly to any environment.

Extensive choice of LED colours

CLS fixtures offer exceptionally homogeneous colour mixing and high light output in both single colour and mixed colour applications. This allows you to create the perfect atmosphere in any outdoor environment.

> **Single colour** - A consistent light colour for a uniform lighting effect. Available in various colour temperatures ranging from 1800K to 6500K. Ideal for functional lighting and subtle atmospheric accents.

> **Tunable White** - Adjust the colour temperature from cool daylight (6500K) to warm candlelight (1800K), perfectly matched to the desired ambience.

> **RGBW & RGBA** - For vibrant and atmospheric colour applications. While RGBW delivers bright, pure white combined with colours, RGBA creates deep, richly saturated tones with a warm undertone. Ideal for creating distinctive atmospheres.

With CLS, you combine technical flexibility with aesthetic refinement, delivering lighting that is not only functional, but also enhances atmosphere and experience.

Build to withstand extreme weather conditions

The CLS Revo IP67 series is used worldwide in some of the most demanding climatic conditions. For example, these fixtures are installed in the Middle East, where outdoor summer temperatures can rise to 60°C and sandstorms subject the housing to constant abrasion, as well as in countries where winter temperatures can fall to as low as -30°C.

Highlighted quotes

"Of all the European A-brands we work with, CLS has proven to be the product brand with the fewest issues or faults throughout our nearly nine years of operation. This is partly due to the consistent quality and production in the Netherlands, but also because we apply CLS fixtures in the correct way."

> *Lars Mallant, Rainforest Lighting*

"We are great fans of the CLS Revo Series! We use these fixtures in the majority of our outdoor projects, including architectural and garden lighting."

In the 15 years we have been working with CLS fixtures, they have consistently exceeded our expectations thanks to the wide range of beam angles, LED colours, dimming options and accessories available. CLS always provides outstanding service and works closely with us to achieve the perfect lighting solution."

> *Christel Schönberger, Chainlight Lighting Systems*

LED lighting solutions **designed & made** in the Netherlands since 2002
