

Theatre, Concert halls and Pop venues

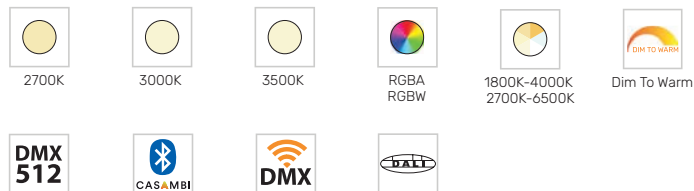

> Theatre, Concert halls and Pop venues CLS lighting solutions in projects

CLS is a fully Dutch manufacturer of high-quality LED lighting. We design and manufacture all fixtures in-house. In addition to standard fixture series we also design specific custom made solutions. For example, we developed and manufactured a large part of the new hall lighting for the Koninklijk Concertgebouw Amsterdam.

Our roots go back 30 years and lie in the cultural world. That's why we know better than anyone what's important when creating the right lighting. CLS works with leading lighting designers to design fixtures that meet the specific user requirements within cultural buildings.

Our focus is therefore on designing fixtures that:

- > Perfectly dim down to very low values.
- > Warm colours of white light for an optimal experience of the atmosphere.
- > RGBW, RGBA, Dim To Warm or Tunable White colour mixing.
- > DMX512 controllable.
- > Extremely reliable, which we also guarantee with a **5 year warranty**.

We develop and supply lighting solutions for all spaces, with the exception of stage lighting.

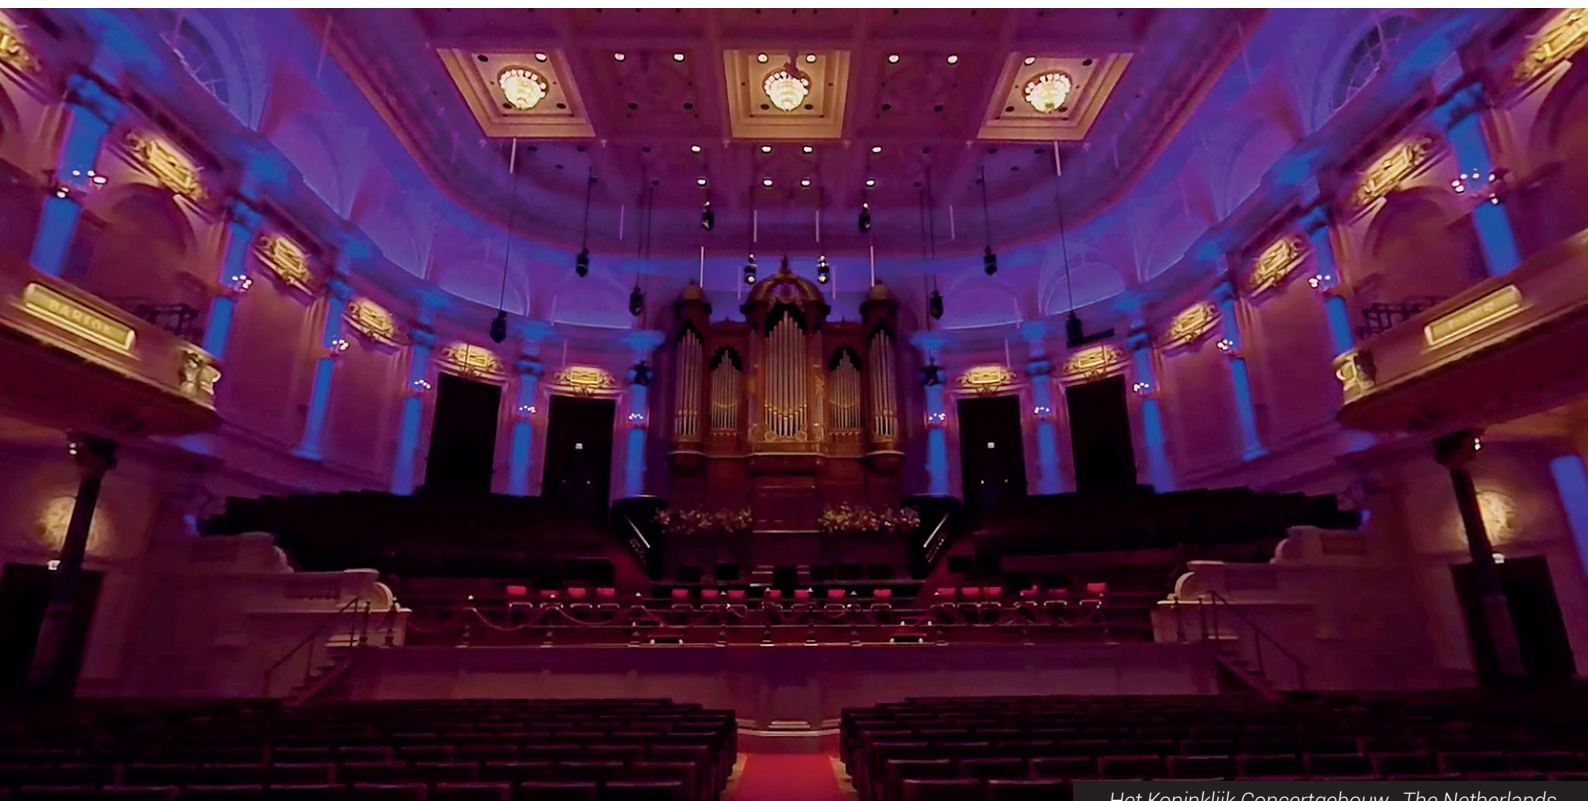

In particular, our venue lighting solutions are unique, combining beautiful white light with the ability to set the venue in any colour. For foyers, restaurants and cafés, we also offer beautiful design fixtures that offer many functions and where one single fixture can create both work light and atmospheric light.

CLS is your partner for the complete conversion of your building to energy-efficient, maintenance cost reducing LED lighting. Deliveries can, if desired, be made via your own trusted installer.

Room fixtures in White, RGBW, RGBA, Dim To Warm & Tunable White colours

Downlighters in White, RGBW, RGBA, Dim To Warm & Tunable White colours

Het Koninklijk Concertgebouw, The Netherlands

Stadthalle Bielefeld, Germany

All lighting is produced in our own in-house manufacturing facility in Nijmegen. If we do not have a standard solution for your specific needs, our own R&D department will develop it for you.
