PROGRAMMING

MAGNO DIMMING

Works without DMX

To store the configuration hold the magnet for 3 seconds on the Focus

Via DMX the Focus Compact can be configured. After setting the DMX to the desired values just hold the magnet on the Focus adapter (between the 2 screws). Hold the magnet for approximately 3 seconds (step 3), when holding the magnet on the Focus it will turn on and when programming has finished the Focus will turn off again. When the light does not turn off after 3 seconds repower and try again.

Addressing

Configure address (1-255) set data on DMX channel 1:
0 = no changes are made.
1-255 = address is set to 1-255.

Configure address (256-508) set data on DMX channel 2:
0 = no changes are made.
1-253 = address is set to 256-508.

Examples:

Address 132 => set data 132 on DMX channel 1.
Address 278 => set data 23 on DMX channel 2.

Soft dim option

When active the Focus will have soft dim curve.
To configure the soft dim function, set data on DMX channel 4
0 = no changes are made.
<127 = function turned off.
>127 = function turned on.

Static brightness

When DMX fails / is not present, programmed brightness will become active.
To configure the static function, set DMX channel 3 to the desired brightness.
0 = no changes are made.
1 = function disabled.
2-255 = brightness of the fixture.

To get the desired intensity level, hold the magnet on the Focus

1. Place the magnet at the center between the 2 screws.
2. The Focus starts slowly dimming from 100 - 1% in approx. 30 seconds. The dimming is very accurate and precise, so steps are very small.
3. At the desired intensity level, take away the magnet.
4. After 10 seconds the Focus flashes one time, the value has been stored on the internal memory.
5. When powering up the Focus, the stored value will be recalled from the internal memory.
6. If you want to have a lower value, replace the magnet and the Focus dims further to lower levels. To store the new setting repeat step 3 - 5.
7. If the Focus is being dimmed to Level 0 and you have not programmed a value, it will automatically start at Level 100 and dim back from 100 - 1%.
