SAFETY INFORMATION

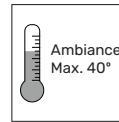

Make sure all connectors are connected properly

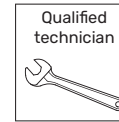

Use a source of AC power that complies to local electrical codes

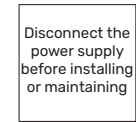

Block access below the work area when maintaining the unit

Don't modify or install genuine parts on this product

Don't install in a flammable or explosive area

Warning! Some surfaces can be hot

Topaz Profile

Casambi adapter

DMX adapter

Bolt Mounting

SPECIFICATIONS

LED: Bridgelux or Xicato
 Available colours: CRI>90 : 2700K, 3000K, 3500K & 4000K
 CRI>98 : 2700K, 3000K, 3500K & 4000K
 Tunable White: 1800K-4000K & 2700K-6500K
 Optics: 12°, 14°, 25, 35° or 55°
 Power supply: 100 ~ 240 VAC (Roto Dim, DMX, W-DMX)
 200 ~ 240 VAC (Non Dim, Local Dim)
 220 ~ 240 VAC (Casambi)

Power consumption: Max. 15 Watt
 Housing: Black or white coated aluminium
 Weight: 780 gr
 IP value: IP20
 Measurements: See drawing
 Ambient temperature: -10° C till +40° C

INSTALLATION BOLT

LENS CHANGE

LOCK POSITION

ACCESSORY ASSEMBLY

DIM METHODS

Local Dim

Local dimming through a potentiometer on the driver housing.

Roto Dim®

1. Place magnet on the back of the Topaz.

2. Turn right or left for the desired dimming value.

3. Remove the magnet from the Topaz.

After aprox. 3 seconds the LED will flash one time, confirming the dim value has been stored.

4. The magnet can also remain seated on the back of the Topaz.

After aprox. 10 seconds the LED will flash one time, confirming the dim value has been stored.

PROGRAMMING

All settings can be configured via DMX. Settings can be configured at once or separately. When one or a couple settings needs to be changed just leave all other setting values zero. This keeps those settings unchanged. Please check the table for more information.

Always use a universal DMX controller with digital interface.

First make sure to set the DATA on the DMX controller. To program the setting into the LED fixture follow the next steps.

DMX single colour programming

* If the LEDs flashes **10 times**, something went wrong. Please try again. If the problem continues to occur, please contact your local sales distributor.

DMX Tunable White programming

* If the LEDs flashes **10 times**, something went wrong. Please try again. If the problem continues to occur, please contact your local sales distributor.

WIRELESS DMX

See the Manual of Wireless Solutions. The Manual can be found on our CLS website, in the Downloads section. Or use the link below
<https://www.cls-led.com/wp-content/uploads/cls-files/W-DMX-manual.pdf>

Unlink procedure

When the fixture does not receive a DMX signal (DMX controller off), place the magnet on the bottom of the fixture for 5 seconds. Slow flash indicates that the fixture is unlinked.

PROGRAMMING TABLE

| PROGRAMMING TABLE | | | | |
|-------------------|------------------------|---------|-------------------------|---|
| DMX | Function | Data | Parameters | Description |
| CH1 | Set address 001 to 255 | 0 | 0 = no change | Use this DMX channel to set address from 1 to 255. |
| | | 1...255 | DMX address = 1...255 | |
| CH2 | Set address 256 to 508 | 0 | No change | Use this DMX channel to set address from 256 to 508 |
| | | 1...255 | DMX address = 256...508 | |
| CH3 | Static behavior | 0 | No change | If no DMX is present the fixture will respond like set in this function. |
| | | 1 | Last DMX value | |
| | | 2 | Output off | |
| | | 3 | Load static values | |
| CH4 | Soft dim | 0 | No change | When dynamic softdim is activated an extra DMX channel behind the colours and/or master controls the soft dim reaction. If fixed no extra DMX channel is used. Value x delay is x*0.1 seconds, varying from 0.1-25.5 seconds. |
| | | 1 | Off | |
| | | 2 | Standard | |
| | | 3 | Dynamic delay | |
| | | 5-255 | Fixed delay | |
| CH10 | Static output | 0 | No change | Each output channel can be set to a static intensity. If no DMX is present and Static behavior is set to "load static values". The outputs will be set to the configured intensity values. |
| | | 1 | Output off | |
| | | 2...255 | Intensity 2...255 | |
| CH14 | Load default settings | 0 | No change | This function resets all settings to the Factory setting. |
| | | 1 | Load Factory settings | |
| CH17 | DMX control | 0 | No change | The intensity control of the output via DMX can be disabled. To enable it again use RDM or power cycle with magnet in place. Wait until flash sequence and remove the magnet. |
| | | 2 | Disable | |

BLUETOOTH BY CASAMBI

For Casambi controlled fixtures, see the manual of Casambi. The Manual can be found on our CLS website, in the Downloads section. Or use the link below:
